

BUSINESS APP FOR SERVICE DEVELOPMENT

APP MADE WITH IONIC FRAMEWORK OR REAGIT NATIVE, FOR ANDROID AND IOS

APP FOR BUSINESS USAGE,FORMAT– NO IMAGES – NEUTRAL COLORS.

BRIEF DESCRIPTION:

User login, Administrator login;

The Administrator creates jobs / contracts.

Administrator creates additional administrative services;

User already logged in, opts for a job already created by the administrator, and through a formulary generates a daily registry of his service provided in the job, already created by the administrator.

User already logged in launches its service activities through a form, every record created / modified when sending: it is sent by e-mail to e-mails pre-registered by the administrator when creating the job, and this registry of the service provided stays in the database for the user to consult, modify, or delete the records generated by it.

User already logged in has access to additional administrative services, in the app, where the user registers for the company also through inquiry form:

- overtime worked,
- also their absences at work and their justifications,
- delayed entry or exit during work hours,
- medical appointments,
- when the company car is taken for refuel,
- when any mechanical issue is detected in the company's car,
- when he needs to request safety equipment,
- when he needs to request manual work tools,
- when he needs to request special work equipment.

In the same way that the provision of services is reported, the additional administrative services, the information is released through a form, every record created / modified is sent by e-mail to pre-registered emails by the administrator when creating additional administrative service, and this additional administrative services registry stays in the database for the user, query, modify, or delete the records generated by it.

And in general, every record created, modified, deleted sends an email with all information changed to the administrator of the service work or additional administrative service.

Push notifications for all users.

User and administrator's options:

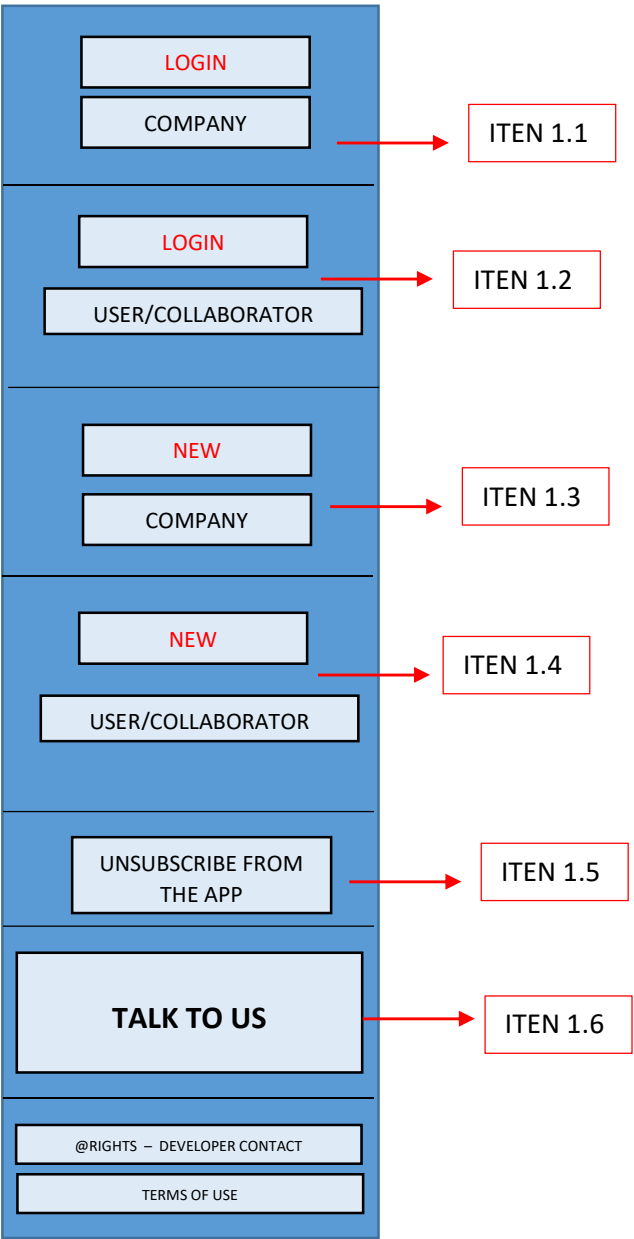

- change passwords,
- be able to recover forgotten passwords,
- be able to delete itself from the app, but the generated information does not go out.

Have a tab with:

- contact us, with all the company's contact information;
- who are we – company history – text only;
- A hiperlink to an internet page.

Have a tab with:

- App's terms of use;
